

## District Leaders Attend Teambuilding Session

District Administrators participated in an engaging and attention-grabbing teambuilding session on July 25, 2019. Administrators created artwork during the morning and attended an interactive session led by Dr. Mary Crenshaw during the afternoon.

During the morning session, administrators challenged themselves to draw as a group. This activity dared educational leaders to think differently and be creative. The unique expressions of individual creativity illustrated to team members that we are all gifted in different ways. This provided the team with an illustration of the importance of diversity and the essential need to embrace our differences to become a stronger and more effective team.

Dr. Crenshaw wowed administrators with her exceptional ability to engage members of the team in various interesting and fun-filled teambuilding activities. She expressed to administrators that everyone is an important member of the team and each person's contribution must be appreciated.
